

Closet Bot: Part I

Team: Tiffany Christensen, Chia-Lo (Caleb) Hsu, Joseph (Joey) Marylander

Title: Closet Bot

Description: An application that allows users to add different articles of clothing into their “closet” and tag the clothing with attributes. The app then tells them what to wear for the day based on specified conditions and what’s in their closet.

Functionality:

- Users can sign up
- Users can log in
- Users can add different types of clothing to their “closet” (top, bottom, accessories, etc.)
- Users can tag clothing with attributes (“red”, “plaid”, “winter”, etc.)
- Users can remove clothing from their “closet”
- Users can view their closet
- Users can generate what to wear based on conditions (seasons, color preference, etc.)
- User closet information is stored in database
- Admins can view a user’s closet
